Diploma in Software Testing • 01/2015 - 01/2015
Seed Infotech, Pune

Core JAVA, Advanced JAVA, Struts Framework, SQL • 01/2015 - 01/2015
Seed Infotech, Pune

PROJECTS

Zento

Project Description: Worked on an expense management application that allows users to track expenses, create budgets, and generate financial reports. The project involved both a web application and an Android app, providing users with a seamless experience across platforms.

Responsibilities:

- Developed and executed test cases for both the web and mobile platforms, covering functional, regression, and UI testing.

- Performed manual and automated testing using tools like Selenium, Appium and Mentis.

- Conducted API testing using tools like Postman to ensure data integrity between the backend and frontend.

- Participated in Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives, to ensure alignment with development teams.

Peak Pacific

Project Description:

Worked on a web-based software solutions platform that provides various software services to clients.

Responsibilities:

- Developed and executed test cases for functional, usability, and performance testing based on requirements.

- Performed cross-browser testing to ensure website compatibility on different browsers (Chrome, Firefox, Safari, etc.).

- Conducted regression testing to identify and fix defects in various builds.

- Collaborated with developers to reproduce issues and verify bug fixes.

Liquidz

Project Overview:

Contributed to the testing of an alcohol e-commerce platform that allows users to browse, purchase, and review various alcoholic beverages. The platform included features such as user authentication, payment integration, search filters, and age verification for legal compliance.

Responsibilities:

- Developed and executed manual test cases for various features, including user registration, product search, checkout process, and payment gateway.

- Performed functional, usability, and compatibility testing across different browsers and devices.

- Participated in Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives, to ensure alignment with development teams.

- Collaborated with developers to identify, report, and verify bugs using Mentis

Embark Perfumes

Project Overview:

Worked on an eCommerce platform specializing in perfumes, where users could browse, filter, and purchase a wide range of fragrances. The site included features like user authentication, product search, shopping cart, payment gateway integration, and order tracking.

Responsibilities:

- Conducted manual and automated testing for the website's various functionalities, including product search, user authentication, and checkout process.
- Designed and executed test cases for functional, regression, and usability testing, identifying and logging defects.
- Performed cross-browser testing to verify compatibility across different browsers and devices.
- Assisted in creating detailed test reports and documentation for future reference.

SKILLS

- Automated Testing
- Manual Testing
- Test Planning & Strategy
- Regression & Smoke Testing
- Test Case Design & Execution
- Selenium
- Jenkins
- TestNG

- Bug Tracking & Reporting
- API Testing
- Postman
- Java
- C
- SQL
- HTML
- JavaScript
