PROFESSIONAL SUMMARY

Quality Assurance Specialist | 8+ Years of Experience

Senior QA Engineer with 8+ years of experience in **web application testing, mobile app testing, and Smart TV platform validation** across large-scale, customer-facing products. Skilled in **manual testing, automation (Selenium, Appium, Rest-Assured), API testing (Postman & Rest-Assured), and backend verification using MongoDB**. Experienced in building test strategies, designing end-to-end test coverage, and ensuring high-quality releases in Agile environments.

Proven track record in **improving test coverage, reducing defect turnaround, validating cross-platform compatibility**, and mentoring junior testers. Looking to contribute to a dynamic QA team with strong expertise across **web, mobile, OTT, and automation**.

SKILLS SUMMARY

Leadership & Mentorship: Team Leadership, Mentoring Junior Testers, Performance Guidance, Process Improvement

Test Management: Test Planning & Strategy, Risk-Based Testing, Test Case Design & Execution, Bug Tracking & Reporting, Stakeholder Communication

Automation: Selenium, Appium, Jenkins, Rest Assured (for API automation), Automation Framework Development, Continuous Testing Integration

Testing Types: Manual Testing, Automation Testing, API Testing, Mobile Testing, SIT, UAT, Incident Management, Smart TV App Testing, Cross-Browser Testing, Functional Testing, Usability Testing, Regression Testing, Smoke Testing & Sanity Testing

Tools and Technologies: Selenium, Appium, Jenkins, Postman, TestNG, GitHub, MongoDB, LambdaTest (brief integration), ClickUp, Smart TV App Automation (Personal Project – Android TV, Fire TV using Appium), R&D for QA Tool Evaluation, Client Communication, Test Strategy Creation, Git, JIRA, Mux (video analytics)

Languages: Java, SQL, JavaScript

Methodologies: Agile (Scrum)

Focus Areas: Compliance, Data Integrity, Defect Management, Cross-functional Team Collaboration, Client Satisfaction

Domain/Platform: IoT Devices (Smart TVs)

Process: KPI Tracking, Metrics Reporting

WORK EXPERIENCE

Senior QA Engineer | Fortune4 technologies

January 2025 - Present

(Client: HT Media – OTTPlay)

- **Led the QA sprint teams for Samsung Tizen, LG WebOS, and Vidaa OS platforms**, driving agile ceremonies and ensuring alignment between cross-functional teams for successful feature delivery.
- **Spearheaded R&D initiatives to optimize Mux video analytics performance on Smart TVs**; analyzed playback metrics and integrated improved event tracking logs, resulting in more accurate QoS data and enhanced streaming stability.

- Oversaw end-to-end testing of the OTTPlay app across multiple Smart TV platforms (Samsung Tizen, LG WebOS, Android TV, Fire TV, Apple TV, Vidaa OS), ensuring seamless functionality and user experience.
- Collaborated with developers and product teams in **Agile sprint cycles**, ensuring a **20% reduction in defect turnaround time**.
- Managed and tracked **test cases, defects, and tasks** using ClickUp, improving team efficiency by **25%**.
- Participated in **daily stand-ups, sprint planning, and retrospective meetings**, contributing to **20% faster sprint deliveries**.
- Ensured timely feedback during sprint cycles, helping to **reduce production bugs by 15%**
- Performed regression and compatibility testing on Vidaa OS-based Smart TVs, extending test coverage across less commonly supported TV platforms.

Associate Quality Analyst | General Data Pvt Ltd

July 2017-January 2025

- Led the Quality Assurance efforts for multiple projects, including test planning, execution, and reporting, resulting in a 25% reduction in issue turnaround time.
- Conducted API testing using Postman, ensuring data integrity and proper communication between Frontend and backend systems.
- Mentored a team of 2 junior testers, improving the team's testing efficiency by 30%
- Collaborated with developers and business analysts to design comprehensive test plans based on client requirements, ensuring full coverage of functional areas
- Contributed user-focused feedback to enhance product quality
- Automated test scripts using Selenium WebDriver and Appium, and integrated test execution pipelines using Jenkins with GitHub for continuous testing and faster validation cycles

KEY PROJECTS

OTTPlay | HTMedia

January 2025 - Present

Project Overview: OTTPlay is a **multi-platform OTT streaming application** that delivers curated content across diverse genres and languages. Designed for **Smart TV platforms**, including **Samsung (Tizen), LG (WebOS), Android TV, Fire TV, and Apple TV**, the app ensures seamless cross-device accessibility.

Responsibilities:

Led QA efforts for a Smart TV OTT platform supporting five major operating systems, ensuring seamless functionality across devices. Focused on improving **release quality** and **test coverage** through structured Agile testing cycles.

- Performed functional, regression, UI/UX, smoke, sanity, and compatibility testing, ensuring a **consistent user experience** across all platforms.
- Verified backend event tracking in MongoDB, improving **analytics accuracy by 15%** for better user behavior insights.
- **Conducted deep-dive R&D on Mux performance**, reducing video buffering events by optimizing analytical tracking in low-bandwidth environments.
- Optimized regression testing time by **30%**, allowing **faster sprint-based product updates**.
- Managed **test planning and execution using ClickUp**, contributing to a **25% efficiency improvement in sprint workflows**.
- Collaborated closely with **development, design, and product teams in Agile cycles**, reducing defect turnaround time by **25%**
- Designed comprehensive test cases and plans from scratch based on user stories and client requirements.

Zento | GDPL

July 2017- August 2021

Project Overview: Led the QA efforts for Zento, an expense management application that supports both web and mobile platforms, enabling users to track expenses, create budgets, and generate financial reports.

Responsibilities:

- Led a team of junior testers, providing guidance on testing practices and ensuring the delivery of high-quality results.
 - Interacted with clients to understand customization requirements and translate them into detailed test plans and test cases.
 - Automated test scenarios using Selenium for the web application and Appium for the mobile app, ensuring robust test coverage across different platforms.
 - Coordinated with cross-functional teams to prioritize testing activities and manage timelines for multiple client-specific customizations.
 - Initiated automation coverage for high-priority modules using Selenium, enhancing test coverage while maintaining manual testing leadership.
-

EDUCATION

Savitribai Phule Pune University

Pune, India

Bachelor of Engineering (Information Technology)

2010 -2014

CERTIFICATIONS

Diploma in Software Testing | Seed Infotech | January 2015

Core JAVA, Advanced JAVA, Struts Framework, SQL | Seed Infotech | January 2015
